VIETJET UPDATES ITS APPROACH FROM TRADITIONAL IOSA TO RISK-BASED IOSA (RBI)

Risk-Based IOSA (RBI)/ *Risk-Based IOSA (RBI):*
- Đánh giá trọng tâm dựa vào mức độ rủi ro an toàn thực tế của từng hãng
  Tailored audit scope to each operator focusing on pertinent safety risks.
- Tiếp cận đánh giá theo chu trình khai thác và mức độ trưởng thành của hệ thống
  Process-based approach and maturity assessment.
- Kết hợp đánh giá từ xa và tại chỗ, linh hoạt điều chỉnh danh mục kiểm tra
  Hybrid (remote and onsite) audit, flexible adjustments of audit checklists.
- Số hóa báo cáo và dữ liệu đánh giá
  Digital audit reports and data.

IOSA truyền thống/ *Traditional IOSA:*
- Đánh giá sự tuân thủ theo danh mục tiêu chuẩn cố định
  Compliance-driven auditing based on standard audit checklist.
- Chủ yếu tập trung vào hồ sơ, tài liệu và quy trình
  Primary focus on records, documentation, and procedures.
- Phạm vi đánh giá giống nhau đối với tất cả hãng hàng không
  Same audit scope for all operators.

From June 29 to July 02, the IATA expert assessment team conducts an on-site assessment at Vietjet as part of the IOSA 2026 certification renewal assessment program using the Risk-Based IOSA (RBI) methodology, focusing on risk management effectiveness, Safety Management System (SMS), and compliance with international standards for safety, operational quality, and service quality.

Maintaining the IOSA certification not only affirms Vietjet's operational capabilities according to international standards but also demonstrates its commitment to continuously improving afety, service quality, and operational efficiency. Along with the ISAGO certification for ground operations, IOSA further strengthens Vietjet's brand reputation and builds trust among passengers and partners.

Vietjet welcomes new airbus A321neo aircraft

In June, Vietjet added two new aircraft, an Airbus A321neo (VN-A203) and an Airbus A321neo ACF (VN-A202), to its modern fleet after they arrived at Noi Bai International Airport, boosting capacity to meet rising travel demand during the 2026 summer peak season. As Airbus' new-generation aircraft, they feature advanced technology that improves operational efficiency while reducing fuel consumption, CO_2 emissions and noise. The additions support Vietjet's sustainable development strategy, enhance service quality and provide passengers with safer and more comfortable journeys.
