Vietjet digitalize its fleet's technical information update process

On Feb 16th, new-aged carrier Vietjet and Lufthansa Technik today signed an agreement to adopt AVIATAR's Technical Logbook, the seamless digital pilot-to-maintenance collaboration application.

The application will be equipped on Vietjet's

entire fleet to replace manual and paper -based process of capturing technical issues during flight and on ground and improve data quality and speed as well as transparency. AVIATAR's Technical Logbook enables

optimization for its entire fleet with up to 1,200,000 hours of safe operation. completion of flight logbook input and maintenance pre, during flight, and upon

arrival as it is seamlessly integrated in Vietjet's maintenance and engineering system. Furthermore, the application's advanced features and enhanced back-end capabilities will lead to decreased turnaround times while increasing fleet's technical reliability and operational safety.

President's official visit to Singapore,

SOVICO Group, Vietjet and Changi Airports International (CAI), the international arm of Changi Airport Group, have signed a strategic partnership agreement worth \$US1.5 billion to develop the provision of aviation services at airports in Vietnam and in the region. The signing marks the first time that a private corporation and an airline in Vietnam collaborate with an international airport

group to develop aviation services and facilities. The parties will cooperate in the research and development of projects at airports in Vietnam, which include green, sustainable and smart infrastructure development projects.

shares have leapt up considerably, getting close to the estimated prices by securities companies. Citing VnDirect's analysis, Vneconomy forecast that shares of Vietjet Aviation JSC (VJC) would strongly recovery post-pandemic. Following the low-cost business model,

certificate for Vietjet

IATA renews IOSA

renewed the IOSA certificate for Vietjet, thereby helping Vietjet continue to maintain its IATA membership. The IOSA assessment process is carried out independently by an expert unit sent by IATA, comprehensively deployed in all

operating departments of the airline such as: Airline organization and management system, flight operations, flight control, operations control – flight operations, aircraft engineering and maintenance, cargo operations, operations security, cabin operations and ground services. According to statistics, since the introduction of IOSA, airlines with this certification have a record of 4 times safer operations than those without certification.

Vietjet built and obtained the IOSA certificate for the first time in 2014 and continues to maintain operating standards to successfully receive the evaluations in 2016, 2018, 2020 and 2022.
